

Underage Drinking in New York

The Facts

Tragic health, social, and economic problems result from the use of alcohol by youth. Underage drinking is a causal factor in a host of serious problems, including homicide, suicide, traumatic injury, drowning, burns, violent and property crime, high risk sex, fetal alcohol syndrome, alcohol poisoning, and need for treatment for alcohol abuse and dependence.

Problems and Costs Associated with Underage Drinking in New York

Underage drinking cost the citizens of New York \$3.2 billion in 2005. These costs include medical care, work loss, and pain and suffering associated with the multiple problems resulting from the use of alcohol by youth.¹ This translates to a cost of \$1,803 per year for each youth in the State. New York ranks 38th highest among the 50 states for the cost per youth of underage drinking. Excluding pain and suffering from these costs, the direct costs of underage drinking incurred through medical care and loss of work cost New York \$1.2 billion each year.

**Costs of Underage Drinking
New York 2005**

Costs of Underage Drinking by Problem, New York 2005

Problem	Total Costs (in millions)
Youth Violence	\$1,722.7
Youth Traffic Crashes	\$617.1
High-Risk Sex, Ages 14-20	\$302.7
Youth Property Crime	\$135.5
Youth Injury	\$114.2
Poisonings and Psychoses	\$37.4
FAS Among Mothers Age 15-20	\$55.2
Youth Alcohol Treatment	\$262.0
Total	\$3,245.9

Youth violence and traffic crashes attributable to alcohol use by underage youth in New York represent the largest costs for the State. However, a host of other problems contribute substantially to the overall cost. Among teen mothers, fetal alcohol syndrome (FAS) alone costs New York \$55.2 million.

Young people who begin drinking before age 15 are four times more likely to develop alcohol dependence

and are two and a half times more likely to become abusers of alcohol than those who begin drinking at age 21.² In 2004, 6,427 youth 12- 20 years old were admitted for alcohol treatment in New York, accounting for 5% of all treatment admissions for alcohol abuse in the State.³

Alcohol Consumption by Youth in New York

Underage drinking is widespread in New York. Approximately 823,000 underage youth in New York drink each year. In 2005, according to self-reports by New York students in grades 9-12:⁴

- 76% had at least one drink of alcohol on one or more days during their life
- 25% had their first drink of alcohol, other than a few sips, before age 13
- 43% had at least one drink of alcohol on one or more occasion in the past 30 days
- 24% had five or more drinks of alcohol in a row (i.e. binge drinking) in the past 30 days.
- 4% had at least one drink of alcohol on school property on one or more of the past 30 days.

In 2005, underage drinkers consumed 16.5% of all alcohol sold in New York, totaling \$1.7 billion in sales. These sales provided profits of \$834 million to the alcohol industry.¹
